

Activity of the Week

How much do I weigh on the moon?

-Go to the weighing station to find out! As you learned in class, gravity is the force that pulls things towards the center of the Earth. When we weigh something, we are actually measuring this force! Your bodyweight will be different, depending on what planet you're standing on!

For extra credit, send me the answers to the questions below.

Your first name:

Your last name:

1) How many pounds do you weigh on the moon?

2) On which planet would you weigh the most ?

- Mercury
- Jupiter
- Saturn

3) On which planet would you weigh the least ?

- Venus
 - Neptune
 - Mars
-
