

Activity of the Week

Which Material Works Best? -When we take a careful look at all of the man-made things around us, we quickly realize just how many different materials there are in the world. This activity allows you to test 6 different materials and lets you discover the strengths and weaknesses of each. **Be sure to test ALL 6 materials and play the QUIZ GAME before sending me your answers to the questions below.**

For extra credit, send me the answers to the questions below.

Your first name:

Your last name:
