

## Activity of the Week

To answer the questions below, please play **BOTH** activities below:

1. [Fun with Food Webs](#) -See if you can put all of the plants and animals in the correct spots for three different types of food webs- meadow, arctic, & pond habitats.
2. [Food Chain Reaction](#) -A lot of people don't realize just how much the survival of each plant and animal affects the balance of a food web. Play this game to learn more.

---

**Your first name:**

**Your last name:**

All living things ultimately get their energy from...

- The wind
- The rain
- The Sun
- The food store

When one plant or animal disappears from a food chain, it affects all of the other plants and animals in the food chain.

- True
- False

What happened when we took the frogs out of our food chain in the [SECOND ACTIVITY](#)?

- The grasshopper population grew huge.
- The grasshoppers ate all of the grass, which caused the grasshoppers to die out.
- The snakes looked elsewhere for food.
- ALL of the ABOVE
